

TF7xx update log

-
-
-

- 15th./May/2022

APP : v2.20-b

- [Echo-HD mode] was set to [off] as default, suggest to turn it on *when water deeper than 1.5m & NO electronic-noise interference from engines.*

- improve #1 color palette

- improved the compass(inside screen) reading process; for previous version, *when compass fault*, will result the screen can't be power off.
- improved compass self-check when power on

- 6th./ May/2022

App: **v2.20**(not used for massproduction)

- o add [Echo-HD-Mode] menu, to boost the image quality and show more details
- o update the menu of [color-style], up to 8 color support

#1: balanced color palette

#2: high contrast color palette

#3~7: single color with gray scale, to provide light 3D view of bottom

#8: default as black & white color; user can load user defined color palette from menu: Sonar/Load New Color

- [TF750 ONLY] improved file name format of *.tslw record file
 - [TF750 ONLY] increase the waypoints number limit to 500 when user import kml with [multi-target-autopilot]
